

# RABIK THAPA

## PROFESSIONAL SUMMARY

---

Detail-oriented QA Engineer with nearly 3 years of experience in Manual and Automation Testing. Skilled in Selenium, Cypress, Robot Framework, API testing, and database validation. Experienced in Agile environments, independently managing end-to-end QA cycles. Successfully reduced regression testing time by 30% and reported over 50 critical defects, improving overall product quality.

## WORK EXPERIENCE

---

**Tech Glazers** December 2022 – April 2023

*QA Intern*

- Worked on Marco's Restaurant Equipment, a commercial restaurant and kitchen equipment supplier operating through an international-facing platform
- Executed manual test cases for web-based applications
- Maintained test execution reports and documentation in Excel

**Tech Glazers** May 2023 – December 2023

*QA Engineer*

- Worked on Kido O Clo, a Nepali children's clothing platform, conducting manual and Cypress automation testing across user and admin portals
- Designed and executed detailed test cases based on business requirements
- Reported and tracked defects using Asana
- Performed load and performance testing using JMeter
- Generated automation reports using Mochawesome

**Code Mount Labs** January 2024 – Present

*QA Engineer*

- Worked on TooLost, an international digital music distribution and rights management platform, delivering manual and automation testing
- Performed API testing using Postman and validated database records with MySQL
- Reported and tracked defects using Jira
- Developed and executed automation frameworks using Selenium and Robot Framework
- Generated automation reports using Allure integrated with Selenium

## SKILLS & SPECIALIZATIONS

---

<b>Automation Tools</b>	Selenium, Cypress, Robot Framework
<b>API &amp; Performance</b>	Postman, JMeter
<b>Databases</b>	MySQL (Data validation)
<b>Test Management</b>	Jira, Asana
<b>Reporting</b>	Mochawesome, Allure
<b>Other</b>	AWS services

## PROJECTS

---

### Marco's Restaurant

marcosrestaurantequipment.com

- Performed end-to-end manual testing of core features and user workflows
- Documented defects and created detailed QA reports for developer review

### Kido O Clo

kidoooclo.com

- Executed Cypress automation for user and admin portals
- Performed mobile UI and functional testing across devices
- Prepared QA reports and collaborated with developers to resolve defects

### TooLost

toolost.com

- Designed and implemented Selenium and Robot Framework automation frameworks
- Conducted functional, regression, and API testing of core modules
- Validated data injection, database records, and White Label feature configurations
- Generated detailed test reports with Allure for automation results

## EDUCATION

---

### Bachelor of Computer Engineering

November 2018 – June 2023

Kantipur Engineering College (Tribhuvan University), Nepal

## CERTIFICATIONS

---

Cloud Computing, AWS — [Certificate Link](#)

Robot Framework Automation Testing, Udemy — [Certificate Link](#)
